

EDUCATING KIDS ABOUT TEMPTATIONS
reduces the harmful effects that temptations have on their minds.

WIZARD WISDOM — Sometimes when kids are being tempted to have or do something that they know is not appropriate, kids just don't understand enough to resist or don't realize how serious the harm is if they accept a temptation. There are emotional intelligent tools to help kids resist temptations. Kids can learn to resist when they are provided with necessary knowledge about temptations and creative techniques and strategies that help them resist. Take time to share this year's educational material about temptations at e-ii.org with kids, as the material was designed to help kids more easily recognize temptations and better understand how to resist them.
