

CROSSWORD PUZZLE

INDIFFERENCE

Indifference toward effort and learning is a significant barrier to healthy mind development. Unfortunately, indifference is much easier for us to accept than the effort required for healthier behavior. This crossword puzzle provides a list of some of the most damaging ways the mind can be indifferent about quality behavior and cause major problems.

Instructions: Fill in the squares using the word list below. Begin by positioning the word with 4 letters in the 4 row of squares, and then work your way from there. Also, place a check-mark in the box next to each word listed as you find its place in the puzzle to know which ones are left to be placed. It's best to use a pencil, so that you can easily change errors.

As you think about each word you are trying to place, consider how hurtful and consequential these kinds of behavior can be. Enjoy the challenge!
